

Horizon

FOLDING

AFV-56 series TV-56 series

Fully automated functions bring
stable and high quality production.

INCREASED PRODUCTIVITY WITH THE HIGHEST LEVEL OF AUTOMATION.

Newly added functions enable easy operation and maximize quality and productivity.

BENEFIT

USER-FRIENDLY SETUP

Icon based touchscreen enables intuitive setup and operation. New functions allow for automatic and easier setup for each section.

ADVANCED AUTOMATION

Increased deployment of proven automation technology, results in precise set-up and quality folds in record times.

HIGH QUALITY

Uniquely designed buckle plates and folding mechanics ensure consistent folding accuracy across a wide range of substrates.

EASY SETUP

The scoring navigator enables quick, accurate setup of scoring and perforation positions.

APPLICATION FLEXIBILITY

Flexible machine configurations and a variety of options allow for a wide range of applications.

MANAGE YOUR BINDERY WITH PXNET

The system can be enhanced with JDF workflow from upstream to postpress using the Horizon pXnet Bindery Control System.

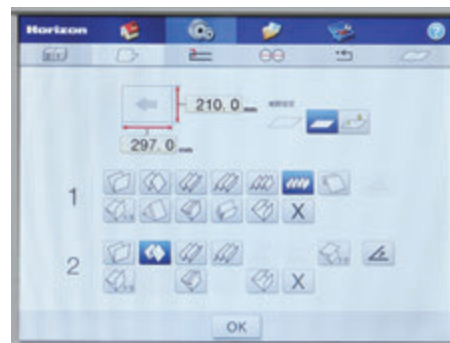

KEY FEATURES.

INTUITIVE OPERATION

The large, color touch-screen and monitor is icon based for user-friendly operation with minimal training required.

Standard fold patterns are graphically illustrated and selectable. Simple tab selection, drop down windows and easily identifiable icons makes set-up and operation quick and efficient.

With 999 job memory positions unique fold patterns, repeat jobs and unscheduled job interruptions are never a problem.

Setup is completed by selecting the desired fold pattern and inputting the sheet size.

FULLY-AUTOMATED SETUP INCREASES EFFICIENCY AND QUALITY

42 sections are automatically setup by inputting the sheet size and fold pattern at the touch-screen.

Fully-automated setup enables any operator to produce consistent, high quality folds with efficiency and high productivity.

Fine-adjustment for skewed folds sets automatically by entering the skewed fold measurement or shift amount of the sheet register guide.

NEW FUNCTIONS FOR HIGH PRODUCTION EFFICIENCY.

AFV-56 and TV-56 series have new and improved features for easy operation.

ROLLER GAP ADJUSTMENT

***For AFV-566DF / 564DF / 566F / 564F**

All fold roller gaps are automatically set by inserting a single strip of paper. Gap setting according to sheet thickness and fold pattern. Set-up time is greatly reduced with elimination of sheet insertion for each roller gap.

Roller Gap Adjustment (Photo: AFV-56DF / AFV-56F series)

AUTOMATED REGISTER CONVEYOR (AFV-56 SERIES)

- The vacuum register guide sets automatically. Sheets are properly aligned to the guide for folding accuracy.
- Five vacuum chambers adjust automatically for sheet length, coated or uncoated surface. Vacuum can be adjusted individually based on sheet condition.
- Vacuum setting can be memorized for easy recall.
- Efficient blower motors insure long lasting performance and energy efficiency.

RIGHT-ANGLE REGISTER CONVEYOR (TV-56 SERIES)

- Conical drive rollers are used for accurate sheet registration with minimal adjustment required.

BUCKLE PLATE **AFV-566DF / 564DF**

- Uniquely designed buckle plate enables improved folding accuracy and consistency for a wider range of substrates including thinner sheets.
- Specially-coated buckle plates minimize paper friction and static to maintain fold accuracy.
- Optional Dynamic Buckle Plate automatically controls the buckle plate deflector to change fold pattern on-the-fly.

SCORING NAVIGATOR

- Scoring navigator allows operator to adjust accurate scoring and perforation positioning with easy setup procedure.
- Scoring position can be adjusted incrementally by 0.1 mm.
- Settings can be saved to memory for recall on reoccurring jobs.

BRIDGE CONVEYOR (OPTIONS: BGV-56 / BGV-56BBS)

- Bridge conveyor is on slide rail for easy access to the scoring shafts.
- Smooth transfer of sheets to the 2nd fold section, presser stacker or delivery conveyor.
- The BGV-56BBS automatically adjusts to maintain center registration at the BBS-40 book block stacker.

DYNAMIC FOLD **AFV-566DF / 564DF**

- Optional dynamic buckle plate is available for changing the fold patterns on-the-fly for book production. For example, 12 page and 8 page signatures can be produced consecutively to reduce blank pages in the book.

ITEMS FOR AUTOMATED SETUPS		DESCRIPTIONS	FIRST STATION			SECOND STATION

Feeder Section	Suction Head	Suction head moves to feeding position according to the sheet length.	Yes	Yes	No	No	No
	Table Guide	Table guide moves to the proper loading position according to sheet width.	Yes	Yes	Yes	No	No
	Vacuum Register Belt	Vacuum register belt moves together with register guide. Sheets align to guide by vacuum. Vacuum level can be adjusted and sets automatically according to sheet quality.	Yes	Yes	Yes	No	No
	Sheet Register Guide	Register guide moves to proper position according to sheet width.	Yes	Yes	Yes	No	No
	Sheet Edge Guide	Sheet edge guide sets to proper position to support sheet edge for smooth sheet transport.	Yes	Yes	Yes	No	No
	Register Guide Angle	Register guide angle can be adjusted from - 4 mm to + 4 mm.	Yes	Yes	Yes	No	No
Fold Section	Sheet Hold-down Guide	Sheet hold-down guide adjusts to sheet width for smooth sheet transfer to fold section.	Yes	Yes	Yes	No	No
	Roller Gap	Roller gap sets up automatically by inputting the single sheet into the caliper.	Yes	Yes	No	Yes	No
	Buckle Stopper	The buckle stopper position is set automatically depending on the sheet size and fold pattern.	Yes	Yes	Yes	Yes	Yes
Right Angle Conveyor	Scoring Position	Score roller position is located automatically based on sheet width and fold pattern.	Yes	Yes	No	No	No
	Register Guide	Sheet register guide sets automatically according to fold pattern at 1st unit.	No	No	No	Yes	Yes
	Sheet Hold-down Guide	Sheet hold-down guides adjust for smooth transfer of sheets to 2nd fold section.	No	No	No	Yes	Yes

DETAILS FOR EACH SECTION.

From feed to finish.

1 TOUCH PANEL DISPLAY

The 12.1 inch color touch-screen is icon-based for user-friendly operation. Setup and operation can be done at the touchscreen. The register conveyor, sheet edge guide, register angle, score adjusting position, and cross-fold register guide are also included in the automated setup function.

Remote Controller

Wired remote controller with jog dial allows for start, stop feeding and test feeding from a remote position. Fine tuning of all automated settings is also possible via the remote control.

2 SUCTION HEAD / ASSIST AIR

Newly designed suction head and feeding system enables easy setup and consistent feeding. Innovative suction head and assist air* provide accurate sheet separation and pick-up. Blowing air volume and height of the suction head can be adjusted according to sheet condition for stable feeding of a wide variety of sheets.

(* The assist air kit SAB-56V with adjustable nozzle height is available as an option.)

Suction Head

3 FEED ROTOR

Quality polyurethane rotor provides high speed feeding (40,000 sheets per hour) without scratching. The suction angle adjustment enables stable feeding by adjusting the angle of suction air according to the sheet condition. The supersonic and photoelectric double feed detect sensors come standard for superior double feed protection.

Supersonic Sensor

The supersonic double feed sensor works through the transmission of sound waves. Its advanced detection ensures accurate double feed detection even with a solid black printed sheet.

4 SHEET REGISTER GUIDE

The Register guide is coated with a special anti-static plating, for trouble-free folding of printed sheets, even in dry climates, where static can be a problem. Newly-designed register guide ensures stable transportation and accurate registration of a wide range of paper stocks. Automated register conveyor sets each guide depending on the sheet width. A clutch brake on the transport section stops double-fed sheets on the register table. Previously fed sheets are processed through the fold section.

5 BUCKLE PLATE

Uniquely designed buckle plate enables improved folding accuracy and consistency for a wider range of substrates, including thin, light weight sheets. Specially-coated buckle plates minimize paper friction to maintain fold accuracy. For the AFV-566DF and AFV-564DF dynamic folders, uniquely designed automatic gate mechanism enables changing fold pattern on the fly.

6 FOLD ROLLER

Unique design and precision manufacture insure folding accuracy and long roller life. Soft or hard urethane rollers are available depending upon folding requirements.

Soft urethane roller
(Segmented)
RL-566VS
RL-564VS

Hard urethane roller
(Segmented)
RL-566VH1
RL-564VH1

7 FOLD ROLLER DRIVE

Fold rollers have positive drive with helical gears for maximum folding precision and quiet operation.

8 PERFORATION / SCORING

Perforation, slit perforation, scoring and slitting can be performed. Durable scoring unit is employed for accurate scoring. Optional devices are available for strip trimming of multiple-up jobs, trimming the closed side of glued signatures and punch perforation.

Scoring navigator allows operator to adjust accurate scoring and perforation position. Up/down scoring and drive roller positions are indicated on the touch screen. Set-up time for scoring is greatly reduced even for inexperienced operators.

Optional strip trim unit AF-ST5N is attached in the photo.

DETAILS FOR EACH SECTION.

From feed to finish.

9 BRIDGE CONVEYOR

The unit slides outside for easy score position adjustment.

BGV-56

10 RIGHT-ANGLE REGISTER CONVEYOR

Auto adjusting conveyor and guides with conical drive rollers efficiently transfers even complex folded sheets to the 2nd fold section.

11 DELIVERY CONVEYOR (LCVV-56)

A wide belt surface is capable of delivering any size folded piece efficiently. Conveyor height is easily adjusted to the proper sheet delivery height.

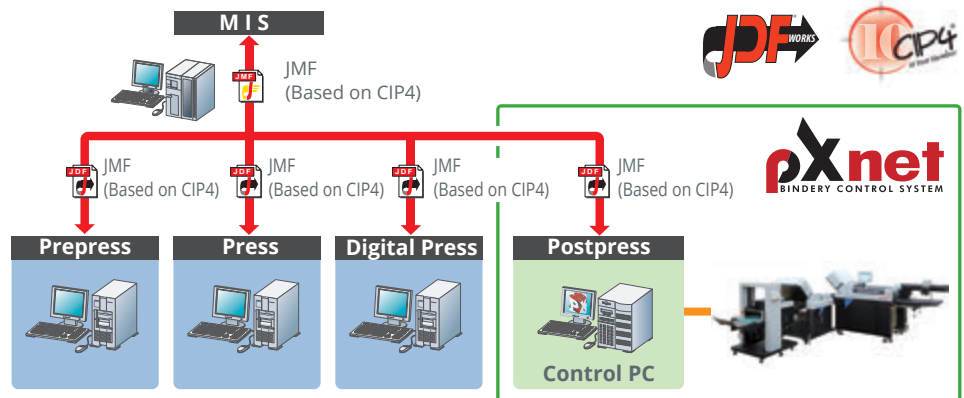

DIGITAL PRINT ENVIRONMENTS.

Workflow Management.

JDF WORKFLOW COMPATIBILITY

The Horizon pXnet system leverages the power of JDF across the bindery, allowing jobs to flow seamlessly through the entire print production process from MIS, Prepress, Press and Postpress.

DIGITAL PRINT ENVIRONMENTS

The AFV-566/564DF is incorporated into a Horizon Smart Binding System for production of folded signatures from a printed roll. Sheet length and fold pattern change is handled automatically.

OPTIONS.

Add-on systems.

| DIFV-56 INTERFACE CONVEYOR

- DIFV-56 transports sheets cut from a printed roll to the AFV-566DF. Optional bar code reading allows for variable sheet length and fold pattern change on the fly.

| BBS-40 / BBS-40L BOOK BLOCK STACKER

- Signature book blocks are accumulated and tack glued for downstream processing. Faulty book blocks are automatically rejected.

| PST-66 / PST-44 / PST-44L PRESS STACKER

- First roller removes air between sheets and the second roller presses the sheets tightly to compress the booklets with 12,000N / 4,000N pressure for the PST-66 and PST-44/44L respectively.

| MKU-38 MOBILE KNIFE UNIT

- Rotatable knife unit can fold up or down for a wide range of sheets from 90 to 380 mm width.

MKU-54T MOBILE KNIFE FOLD UNIT

- The MKU-54T is a mobile knife unit equipped with a buckle fold plate under the knife. Letter fold and 8-page cross folds are possible.

MKU-54T

PSX-56 / PSX-56R PRESS STACKER WITH PILE DELIVERY

- Stacked signatures or booklets are delivered to a comfortable height for easy packaging. Applications can be stacked 1-up, 2-up or 3-up for efficient production. Rigid, large diameter rollers apply 1.2 tons of pressure for crisp, tight and flat folds.

ED-40S STANDING DELIVERY UNIT

- Tightly folded pieces are delivered in an orderly, standing position for easy off-loading. An automatic batch kicker makes separation for packaging easy and accurate.

OPTIONS.

Performance Enhancing Options.

GFB-56V GATE FOLD BUCKLE

- The gate fold buckle can be set up quickly, with no special skill for precise, accurate closed gate folding.

BLADES

- A wide variety of optional blades are available for various applications. (Blades in the photo are examples.)

Unit: mm (Cut x Blank)

IC-56V-U / IC-56V-L SHEET CHECKER

- The camera verifies the image on the sheet with the preset image to identify any blank and misloaded sheets.

CGU-50 GLUING UNIT

- The gluing unit can produce 8-page or 12-page glued booklets and direct mail applications.

Gluing Unit Controller

Glue Gun

FP-56 / FP-56V / FP-56VP FRONT PERFORATION UNIT

- Accurate perforation before folding is ideal for direct mail applications and page tear out applications. Jump perforation is possible.

CONFIGURATION 1

■ Stand-alone 6-buckle

Stand-alone 6-buckle or 4-buckle configuration for brochure or leaflet folding.

AFV-56 series + LCVV-56

(Top View)

CONFIGURATION 2

■ Right Angle 6/4 Buckle system

Buckle folding system is available with 4 or 6 buckle plates in both the parallel and right angle sections. Right angle configuration expands folding patterns for applications, including direct mail and book signatures. This configuration also allows for scoring in the first station and folding on the second station for heavier weight stocks.

AFV-56 Series + TV-56 Series + PST-44L

(Top View)

CONFIGURATION 3

■ In-line 6/6 Buckle System

Straight 6/6 (4)-buckle modular system for maximum 10 or 12-buckle operation. Complex fold patterns can be performed with this configuration.

AFV-56 series + TV-56 series + PST-44L

Signature Size	 <p>Maximum Width 400 mm or 15.74" Maximum Height 150 mm or 5.90" Minimum Width 30 mm or 1.19" Minimum Height 20 mm or 0.79"</p>
Thickness of Folded Piece	Max. 3 mm or 0.12"
Stack Capacity	Max. 395 mm or 15.55", Min. 5 mm or 0.20"
Belt Speed	30 to 160 meters per minute
Offset Amount	Minimum Offset: Five sheets
Voltage/Frequency	Single Phase 200 to 240V, 50 or 60 Hz
Machine Dimensions	W982 x D624 x H1,153 mm or W38.7" x D24.6" x H45.4"

BBS-40 / BBS-40L SPECIFICATIONS

Signature Size	 <p>Width x Length Max. 385 x 275 mm or 15.15" x 10.82" Min. 148 x 105 mm or 5.83" x 4.13"</p>
Signature/Booklet Thickness	Max. 2 mm or 0.15" Min. 0.2 mm or 0.008"
Stack Height	Max. 80 mm or 3.14" Min. 2 mm or 0.08"
Delivery Height	BBS-40: 900 mm or 35.5" BBS-40L: 700 mm or 27.6"
Production Speed	Press Roller Speed: 50 to 160 meters per minute Transport Section Speed: 30 to 80 meters per minute Delivery Section Conveyor: 20 to 40 meters per minute Infeed speed: 16,000 sheets per hour Output Cycle: Max. 2,000 blocks per hour
Number of Press Rollers	Air Remove Roller x 1, Press Roller x 1
Voltage/Frequency	Single Phase 200 to 240 V, 50 or 60 Hz
Machine Dimensions	BBS-40: W2,910 x D830 x H1,135 mm or W114.6" x D32.7" x H44.7" BBS-40L: W2,910 x D830 x H935 mm or W114.6" x D32.7" x H36.9"
